FULL-STACK DEVELOPER (Next.js)

Full-stack developer with 1+ year of experience building fast, modern, and scalable full-stack web applications using **Next.js**, **Firebase**, and **Tailwind**. Experienced in developing complete production-ready websites, improving performance, fixing critical issues, and delivering clean UI/UX with reusable components. Strong background in both **client work** and **institutional projects**, with hands-on experience in deployment, authentication, payment integration, and admin systems.

TECHNICAL SKILLS

Frontend: Next.js, React, Tailwind CSS, Framer Motion

Backend: Firebase (Auth, Firestore, Storage), Node.js, Express

Database: Firebase Firestore, MongoDB (basic)

Tools & DevOps: Git, GitHub, CI/CD, Vercel, Netlify

Other: REST APIs, JWT Auth, Nodemailer, Razorpay Integration

PROFESSIONAL EXPERIENCE

Software Developer — Aardo Solutions

Sep 2024 – Sep 2025 - Completely developed the company's official website **from Figma to production** using Next.js, Tailwind, and Framer Motion.

- Built **10–12 reusable components** improving development efficiency and UI consistency.
- Implemented smooth micro-interactions using **Framer Motion**, significantly enhancing user experience.
- Optimized website performance and reduced layout shifts for faster load times.
- Integrated contact forms using **Nodemailer** with secure backend handling.

Software Developer Intern — VIPS (Vivekananda Institute of Professional Studies)

Jan 2024 – Present - Built **20+ pages**.

- Developed **15+ Admin Pages** and **10+ admin features** including secure feedback collection, placement updates, and data access.
- Improved performance of the main institutional website through UI optimization and refactoring.
- Fixed critical bugs and improved component structure using React + Material UI.
- Worked with React, JavaScript, Styled Components, Firebase, Git & GitHub.

PROJECTS

VIPS Feedback Portal - Large-Scale Internal Feedback

Next.js, Tailwind, Firebase, Server Actions, RBAC, Security first

- Used by **4+ departments** with **1,000+ active users** and growing.
- Built secure role-based access control (RBAC) system for admins, faculty, and students.

- Implemented account creation, anonymous feedback submission, and dashboards.
- Developed scalable architecture using Firebase + Next.js server actions.
- Designed modern UI with Tailwind and optimized performance for heavy usage.

Ngarg & Co. - Chartered Accountant Firm Website

Next.js, Tailwind, Firebase, Nodemailer

- Fully built from scratch to enhance brand authority and capture leads.
- Implemented secure lead-capture system using **Nodemailer**.
- Improved website responsiveness, accessibility, and visual experience.

Skygaze India - Astronomy & Stargazing Company Website

Next.js, Tailwind, Framer Motion

- Replaced heavy star-field background with a lightweight version, reducing **page weight and improving load speed**.
- Built a fully responsive navbar and fixed critical UI/UX issues.
- Improved animation quality and reduced jank using Framer Motion.

Aardo Solutions Corporate Website

Next.js, Tailwind, Framer Motion

- End-to-end design to deployment implementation.
- Developed reusable component library and optimized performance.

WantJob.in - Job Platform

Next.js, Firebase, Razorpay, Tailwind - Built a functional job portal where admins can post jobs and users can log in and apply.

- Integrated **Razorpay** for payments.
- Actively used by real users.

EDUCATION

Bachelor of Computer Applications (BCA)

Aug 2023 – June 2026

NOTABLE STRENGTHS

- Strong ownership: capable of taking projects from zero to production.
- Deep experience with **Next.js full-stack architecture**.
- Good sense of UI/UX and modern animations.
- Ability to debug, optimize, and improve existing systems.
- Experience working with real clients and live products.
